

A coworker recently turned **Pawn** onto [You Are Listening To...](#), a website which mashes up ambient music and police scanners. Focusing on five cities, Los Angeles, New York, San Francisco, Chicago and Montreal, the site features a simple photograph of the city you chose, along with the aural pastiche appropriate to those climes. Check it out, a shockingly soothing audio backdrop for the workplace.

[You are listening to Los Angeles](#)

As an interesting experiment, just go looking for some sounds you think might go well together. I just loaded up the "Ambient" tag at [Sound Cloud](#) in one browser window, and the Kennedy Space Center [live audio feed](#) in another.
